DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-30, drawn to a gas storage and dispensing system, classified in class 96, subclass 8.
 - II. Claims 31-35, drawn to a hydrogen generation catalyst, classified in class 502, subclass 100.
 - III. Claims 36-47, drawn to a fuel cell, classified in class 429, subclass 31.
2. During a telephone conversation with Mr. Steven Hultquist on 5/1/06 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-30.
3. This application contains claims directed to the following patentably distinct species within Group I:
 - Species I(a): the embodiment of Figure 1
 - Species I(b): the embodiment of Figure 2
 - Species I(c): the embodiment of Figure 3A
 - Species I(d): the embodiment of Figure 4A
 - Species I(e): the embodiment of Figures 5A, 5B, & 5C
 - Species I(f): the embodiment of Figure 7
 - Species I(g): the embodiment of Figure 8
 - Species I(h): the embodiment of Figure 12

The species are independent or distinct because a prior art reference anticipating the claims with respect to one of the species would not render the claim obvious under 35 USC 103 with respect to the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is reminded that a restriction requirement may be made at any time before final action (See MPEP 811).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
